

## ***Innopedia - the wiki for ideas in Aeronautics & Air Transport***

The CREATE consortium invites the air transport community (companies, universities, research establishments, individual students, people with bright ideas,...) to expand the Innopedia website with revolutionary and innovative ideas for the benefit of Aeronautics & Air Transport in the future.

### **What is the CREATE project?**

The CREATE project aims at designing a process to identify and enable creative and innovative ideas for the sustainable future of the Air Transport System. In order to stimulate the capture and development of those breakthrough solutions for the benefit of the Air Transport Community, a wikipedia-like website called **Innopedia** (<http://Innopedia.wikidot.com>) has been developed.

### **What is the Innopedia?**

The objective of the web site is to offer to the Air Transport Stakeholders an interactive platform to share and comment on innovative ideas with a view to creating a corpus of information and maximising interaction amongst the Community.

Interested? The Innopedia awaits your ideas and comments to become a reference tool. The site <http://Innopedia.wikidot.com> is easy to use and you can start from different places depending on what you want to do.

### **Where to get started**

**Get access to Innopedia**  
**Main page**

<http://innopedia.wikidot.com/system:join>  
<http://innopedia.wikidot.com/develop-your-idea>

#### **Menu left side page**

- About this site
- About your ideas
  - How to search for ideas?
  - How to create a new idea?
  - How to refine existing ideas?
  - How to track ideas?
- Get Help
- Forum

#### **Menu at top of the page**

- Systems of systems ideas
- Systems ideas
- Subordinate concepts

**Ideas recently developed on Innopedia**

<http://innopedia.wikidot.com/ideas-merging>

**References page**

<http://innopedia.wikidot.com/references>

### **How to get help**

In case you need help, please contact: [create.innopedia@gmail.com](mailto:create.innopedia@gmail.com)

**Go to <http://innopedia.wikidot.com> and help to stimulate innovative ideas for the future air transport system!**

**Thanks for distributing this information within your network**
